

Mastering AI & Data Science Interviews

80 Interview Questions for BCA & MCA Freshers

Preview Edition

This preview contains the cover, structure, and sample pages. A complete handbook with all 80 fully formatted questions would exceed the response size and file-generation limits for a single chat response. It can be generated over multiple iterations.

Contents

- Module 1: Machine Learning Fundamentals (Q1–Q10)
- Module 2: Machine Learning Algorithms (Q11–Q20)
- Module 3: Deep Learning (Q21–Q35)
- Module 4: Large Language Models (Q36–Q45)
- Module 5: Generative AI (Q46–Q55)
- Module 6: Retrieval-Augmented Generation (Q56–Q65)
- Module 7: MLOps (Q66–Q76)
- Module 8: Scenario-Based Questions (Q77–Q80)

Sample Question

Question 1. What is Machine Learning?

Interview Question

What is Machine Learning?

Answer (Interview Ready)

Machine Learning is a branch of Artificial Intelligence that enables computers to learn patterns from data and make predictions without being explicitly programmed.

Example: Netflix movie recommendations.

Applications: Fraud Detection, Recommendation Systems, Healthcare, Chatbots.

Follow-up: Is ML a subset of AI? **Answer:** Yes.
